## PROFILE

Motivated computer engineering senior student at King Saud University. I am 22 years old and live in Riyadh. I am interested in web and application development, and I enjoy learning new skills and exploring computer-related fields. I have previously developed websites and some simple mobile applications, and I am eager to start my journey in the job market to enhance my experience and skills

---------------------	---

---

## Projects

### A website to explain a university course

I created a website using html and css to explain a course offered at my university, aimed at assisting students in understanding the course material and finding additional resources for learning. This was my inaugural website project, and the experience taught me valuable lessons.

### Profile website

I have developed a personal website to showcase my skills, applying the newfound knowledge of HTML ,CSS and JS that I've acquired. Through this project, I have gained valuable experience and honed my abilities in web development.
